### Project idea

• .background

Most of the wheat utilized in Africa for manufacturing products massively consumed by the population such as biscuits, breads etc.. comes from Russia and Ukrainia. In Bénin 90 % of the available wheat come s from Ukrainia.

Unfortunately the war between Russia and Ukrainia creates the rise of wheat price with negative impact on the availability and affordability of wheat in Benin and Africa.

This situation is not favorable for food security and good health in Benin and Africa.

Therefore it becomes urgent to develop and promote new processes, healthy and sustainable products through the use of "Local cereals and roots as substitute to wheat for healthy foods manufacturing in Benin, Africa in the context of Russia -Ukrainia war."

Concept:

The project aims to promote the use of cereals and roots as an alternative to wheat for foods manufacturing.

Objective:

The objective of the project is to:

Develop and promote healthy, nutritionnally improved, sustainable, affordable and certified foods manufacturing based on local cereals and roots using new processes.

• The consortium is bulding. There are already some partners involved. It is still opned for interested partners.
